Syed Samiullah

Artificial Intelligence Student & AI/ML Engineer

PROFILE SUMMARY

Motivated Artificial Intelligence student at the University of Malakand with a strong command of Mathematics, Python, and C++. Passionate about building intelligent systems using Machine Learning, Deep Learning, and Generative AI, with hands-on experience in LLMs, AI Agents, RAG, and NLP. Practical experience in web development and AI automation, with a growing portfolio of projects hosted on GitHub. Seeking to apply strong analytical thinking, programming skills, and a continuous learning mindset to contribute to impactful AI and software development projects.

EDUCATION

Bachelor of Science — Artificial Intelligence
University of Malakand

Present

Currently pursuing an undergraduate degree in Artificial Intelligence, building a strong foundation in mathematics, algorithms, programming, and machine learning concepts.

TECHNICAL SKILLS

Programming Languages: Python, C++

AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, NLP, RAG (Retrieval-Augmented Generation)

AI Agents & LLMs: Building and integrating LLM-based agents, prompt engineering, AI workflow automation

Mathematics: Linear Algebra, Calculus, Statistics, Discrete Math

Version Control: Git & GitHub for source control and collaboration

Problem Solving: Algorithmic thinking and structured problem-solving approach

EXPERIENCE

Web Developer

Ongoing

Self-directed / Freelance Projects

- Developed and maintained web development projects, documented and version-controlled via GitHub
- Applied programming and problem-solving skills to build functional, real-world web solutions
- Continuously expanding practical experience alongside academic study in Artificial Intelligence

PROJECTS & PORTFOLIO

GitHub Portfolio

github.com/Samme-creator

Collection of AI, machine learning, and web development projects showcasing practical skills in Python, C++, and web technologies.
